ABOUT ANM

IT Made Personal

TECHNOLOGY IS COMPLEX. WORKING WITH YOUR IT PARTNER SHOULDN'T BE.

Since 1994, ANM has helped organizations solve complex technology challenges through deep engineering expertise, trusted relationships, and a commitment to doing what's right for the client.

We're more than 300 people strong, including 175+ engineers across security, connectivity, and transformation. But growth hasn't changed how we work. We take the time to understand your environment, recommend what actually makes sense, and show up when it matters most.

SECURE. CONNECT. TRANSFORM.

We help organizations source, deploy, and manage the technologies that keep them secure, connected, and ready for what's next.

HEADQUARTERED IN ALBUQUERQUE

With offices across Albuquerque, Denver, Scottsdale, El Paso, Casper, Salt Lake City, and Raleigh, ANM combines national reach with local relationships.

Secure. Connect. Transform.

We help organizations source, deploy, and manage the technologies that keep them secure, connected, and ready for what's next.

SECURE

Protect your data, people, and operations with resilient security and recovery.

- Cybersecurity
- Zero Trust Architecture
- Resilience & Recovery
- Physical Security

CONNECT

Build secure, scalable infrastructure that keeps your organization connected from core to cloud.

- Secure Networks
- Data Center & Cloud
- Modern Workplace
- Cabling & Special Systems

TRANSFORM

Modernize operations with AI, advisory, and observability to drive smarter outcomes faster.

- AI
- Advisory & Assessments
- Observability

NOT YOUR TYPICAL IT PARTNER

Engineering-Led

Our solutions are designed by experts, not dictated by sales.

Vendor-Independent

We recommend the technology that's right for your organization — not what's most convenient for us.

Street-Smart

We design solutions that perform after implementation, not just on paper.

Deep Bench Strength

Six engineers for every salesperson — people who know how to turn strategy into working solutions.

The result: technology decisions you can defend and outcomes you can measure.

Expertise Across the Technology Lifecycle

Whether you need strategic guidance, additional expertise for your team, help deploying a complex solution, or ongoing operational support, ANM can meet you where you are.

Consulting

Strategy, roadmaps and assessments that help you make confident technology decisions.

Procurement

Technology sourcing backed by strong OEM relationships and experienced teams.

Implementation

Discovery, architecture, deployment, validation and knowledge transfer from engineers who know the technology.

Managed Services

24x7 monitoring, automation, detection and resolution that complement your internal team.

Lifecycle Services

Ongoing hardware and software lifecycle management to protect your technology investments.

Staff Augmentation

Experienced design engineers, implementation engineers and project managers when your team needs additional capacity.

National Reach

Headquartered in Albuquerque, ANM has offices in:

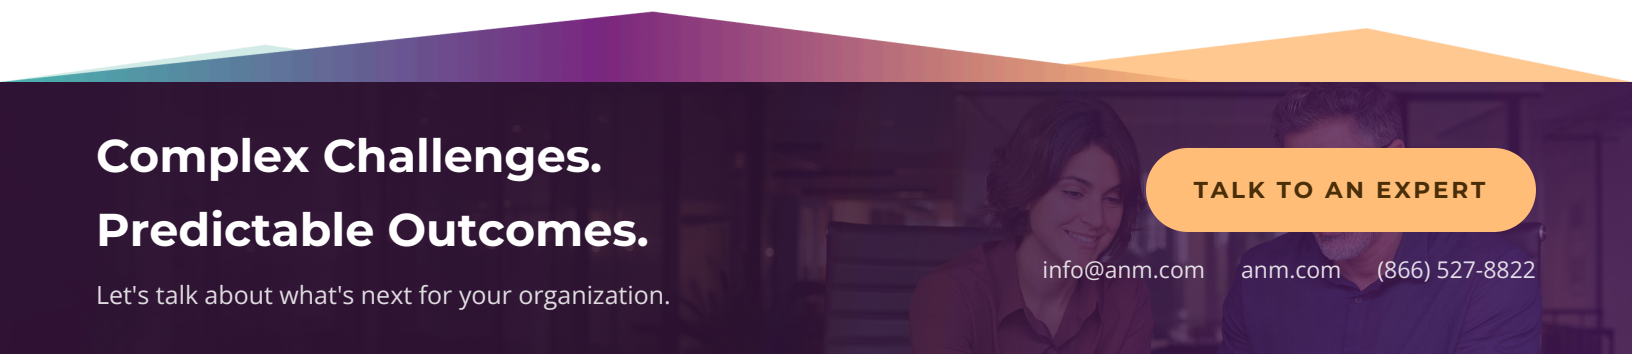

- Albuquerque, NM
- Denver, CO
- Scottsdale, AZ
- El Paso, TX
- Casper, WY
- Salt Lake City, UT
- Raleigh, NC

Local Relationships

Our reach continues to grow, but our approach remains personal: build lasting relationships, solve problems together, and show up when it matters most.

WHY IT WORKS

- Engineers who know your environment
- Vendor-independent recommendations
- Discovery first, products second

Complex Challenges. Predictable Outcomes.

Let's talk about what's next for your organization.
