

Elevate your workspace

Today, it's not where you work, but how you get work done. Dropped calls, spotty sound and limited visibility disrupt productivity and collaboration, with expectations only getting higher as your workforce diversifies. We help you design, install and support scalable audio-visual systems that create reliable, shared experiences.

Questions to consider:

- › Do you need to improve your collaboration and meeting experiences?
- › Do you need to integrate with other meeting spaces?
- › Are you trying to improve the user experience?
- › Are you looking to increase revenue with AV solutions?
- › Are you expanding into a new building/moving offices?

10 minutes — Average delay in starting a meeting due to technology glitches. - Cisco

We offer:

- › Systems integration
- › Storage
- › API-driven programming
- › Custom projects

WHAT SETS US APART

- › Thorough needs-assessment process
- › Combined AV and IT integration services
- › Fully customized end-user adoption services
- › Security integration early in the process
- › Unbiased, solution-agnostic recommendations
- › 24-hour service from a trusted local team

WHAT YOU CAN EXPECT

- › Improved communications, collaboration, presentations and performances
- › Seamless experiences, regardless of location
- › Scalable solutions to accommodate changes to your business
- › Dedicated spaces to improve productivity
- › Flexible, interactive digital signage

Meeting spaces

Today's virtual connections must rival in-person meetings. We create reliable, turnkey AV and unified communication environments for interactive meeting rooms, huddle rooms, boardrooms, conference spaces and more. This includes standalone mobile stations and custom integrations.

Classrooms and training rooms

The demands of a virtual classroom are unique, including high visibility and ease of interactivity. We develop classroom and training space AV solutions to improve the learning experience. This includes specialized presentation systems, custom display solutions and integrated audio solutions.

Video conferencing

Dispersed, global teams call for seamless, high-quality videoconferencing. We design and implement solutions for large conference rooms and lecture halls, as well as huddle rooms and mobile solutions to deliver a universal experience regardless of location.

Structured cabling

A well-designed structured cabling system increases uptime, scalability and return on your investment. Our Integrated Services team designs, installs and maintains your building's cabling infrastructure.

CCTV and access control

Pairing access control and CCTV systems generate smarter video data for your security system. We work with leading hardware and software partners to provide the security you need to prevent theft, shrinkage and other threats.

NOCs/SOCs

Immediate support is critical when point-in-time meetings are at stake. We have extensive experience in the design and operations of emergency communication centers, control rooms and network call centers. We build custom solutions and create a support model to keep your AV experience uninterrupted.

Live venues

The pressure of live, large-scale events adds additional dimensions to your AV needs. We have extensive experience creating and supporting large-scale AV environments for corporations, special events and more.

Digital signage

Digital signage has transformed our ability to share highly visual, custom information in real time. If you need messaging systems or streaming video feeds, we design solutions that incorporate creative displays, automated content and meeting room management.

Managed AV Services

In addition to integrated, scalable AV solutions, we support our technology with managed services including:

- › Help desk support
- › Priority call and on-site response
- › Third-party hardware and software returns
- › Remote monitoring with fault reporting
- › Service management with escalation process
- › Remote device management
- › Equipment loaners

We'd love to hear from you.
