Cloud Calling

powered by Cisco Webex Calling

In today's mobile workplace, seamless connections rule the day.

ANM offers flexible, cloud-based phone service powered by Cisco Webex Calling. It's a solution that lets you enjoy all the benefits of a traditional office phone system without the complexity of managing and securing it. Now you can seamlessly transition from your office to your mobile device with high-quality audio, high-definition video, instant messaging, file sharing and more. Virtual receptionists are also available to greet inbound callers. As a Cisco Gold Partner with a local focus, ANM can get you set up and provide an outsourced, fully managed phone system at one low price.

COLLABORATION IS KEY

Our expertise in web conferencing and collaboration platforms brings people and tools together to improve productivity, communications and problem-solving. We start the conversation with end goals – not product pitches – architecting custom collaboration solutions to meet your needs.

Questions to consider:

- › How are you looking to improve your telephony experience?
- › Is your workforce becoming more mobile?
- › How would you rate your service with your current provider?
- › How familiar are you with cloud calling?

We offer:

- › Feature-rich solutions from a leading provider
- › Tiered feature and pricing options
- › Same-day installation
- › 24/7 personalized monitoring and support
- › All-in-one communication options, including voice, video conferencing and collaboration tools

What sets us apart:

- › Certified Cisco Gold Partner Master Specialized in Collaboration
- › Local, personalized service and support
- › Broad technology platform expertise

What you can expect:

- › Secure, enterprise-grade calling from a trusted brand
- › Feature-rich communications for every location, including remote workers and global offices
- › Personal service not offered by large phone providers
- › Pay-as-you-go subscriptions that increase your technology tools while reducing costs
- › Integration with current applications
- › Option of data analytics with 360-degree customer view
