

Cybersecurity Framework

Given the litany of potential vulnerabilities and security concerns, prioritization is a key challenge for clients everywhere. ANM's Cybersecurity Assessment will help evaluate the current state of your cybersecurity posture to identify strategic initiatives and tactical guidance that will enhance your overall security posture. This will be facilitated by evaluating your current controls and benchmarking them against industry-leading cybersecurity frameworks such as NIST CSF.

Who is the intended audience:

Key security stakeholders including security leadership, security administrators and engineers, and IT leadership and operators.

Agenda for this 4 hour workshop:

Meeting with stakeholders to:

- › Review NIST Cybersecurity Framework (CSF)
- › Review key business and compliance requirements
- › Understand organizational competencies as they relate to security control implementation and management
- › Review existing technology implementations and business use case evaluation

Documentation review to include:

- › Network architecture overview, logical diagram(s), security program drafts, security solution as-built documents or other relevant documentation
- › Technology implementation review of current security technologies deployed

High-level Gap Analysis

Deliverables:

At the end of the workshop, ANM cybersecurity team will provide:

- › Summary PowerPoint with initial findings
- › Completed controls matrix with potential gap

Alongside the documentation delivery, we will schedule a debrief session to review the findings together.

WHAT SETS US APART

- › ANM is a top security providers in the country with a long history of expertise in a variety of security solutions. Our team takes an engineering led approach to problem solving, highlighted by our 6:1 engineering to sales ratio.
- › Unlike many other solution providers, our goal is to proactively identify areas of opportunity in your environment via assessment, as opposed to starting with a product searching for a problem.

FOLLOW-ON SERVICES

- › ANM has several in-depth follow-on advisory services that address a broad range of challenges across the cybersecurity spectrum. These services include penetration testing, tabletop exercises, and security infrastructure optimization. Regardless of your security needs, ANM is here to help you minimize your risk and optimize your operations.

We'd love to hear from you.
