

# ANM Microsegmentation Workshop

Application-centric micro segmentation is a powerful tool to gain detailed visibility, lock down lateral movement and limit the surface area that adversaries can use to attack your systems. This interactive workshop covers the concepts, technologies, and strategies to help your organization develop a roadmap for implementing micro segmentation in your data center and cloud environments.

## Who is the intended audience:

Security teams, network team, data center team, application owners (optional).

## Agenda for this 4 hour workshop:

- › Introductions
- › Security Concepts - Why this is important
- › Introduction to Segmentation & Micro Segmentation and Zero Trust Concepts
- › Campus, North-South Data Center, East-West Data Center, Application Centric Protection
- › Visibility, Policy, Enforcement, Assurance/ Monitoring
- › Discussion about your environment(s)
- › Threats and Risks
- › Regulatory Requirements
- › Network & Security Architecture
- › Applications & Data
- › Users & Endpoint Devices
- › Technologies and Solutions to implement Micro Segmentation
- › Developing a Strategy to Implement Micro Segmentation
- › Next Steps / high level roadmap discussion

## Deliverables:

At the end of the workshop, ANM engineering will create a working roadmap and high level design with suggested solutions mapped to use cases and outcomes for review.

## WHAT SETS US APART

- › ANM is one of the top end to end architecture providers in the country with a long history of expertise across networking, security and data center. Our team takes an engineering led approach to problem solving, highlighted by our 6:1 engineering to sales ratio.
- › Unlike many other solution providers, our goal is to proactively identify areas of opportunity in your environment via assessments and workshops, as opposed to starting with a product searching for a problem.

## FOLLOW-ON SERVICES

- › ANM has several in-depth follow-on advisory services that address a broad range of challenges across the entire network, data center, cloud, and security technology ecosystems. Whether you are planning a Software Defined Networking (SDN) implementation, network refresh, security segmentation strategy, or data center consolidation or move, ANM can help guide you through the complexities of planning and rollout.

We'd love to hear from you.
