

# Zero Trust

As the perimeter has dissolved and users and apps have migrated outside of your four walls, having a centralized security policy delivered ubiquitously has become mission critical. Zero trust architectures ensure users, regardless of location, only have access to the data and applications they need to be successful.

## Who is the intended audience:

Security teams, network team, data center team, application owners (optional).

## Agenda for this 4 hour workshop:

- › Introductions
- › Introduction to the core components of Zero Trust
- › Remote Users
- › Branch
- › Data Center (Microsegmentation)
- › LAN
- › Discussion about your environment(s) and policies
- › Threats and Risks
- › Regulatory Requirements
- › Network & Security Architecture
- › Applications & Data
- › Users & Endpoint Devices
- › Technologies and Solutions to implement Zero Trust
- › Developing a Strategy to Zero Trust
- › Next Steps / high level roadmap discussion

## Deliverables:

At the end of the workshop, ANM engineering will create a working roadmap and high level design with suggested solutions mapped to use cases and outcomes for review. We will also document how zero trust could apply to your organization and best places to start.

## WHAT SETS US APART

- › ANM is one of the top security providers in the country with a long history of expertise in a variety of security technologies. Our team takes an engineering led approach to problem solving, highlighted by our 6:1 engineering to sales ratio.
- › Unlike many other solution providers, our goal is to proactively identify areas of opportunity in your environment via assessment, as opposed to starting with a product searching for a problem.

## FOLLOW-ON SERVICES

- › ANM has several in-depth follow-on advisory services that address a broad range of challenges across the entire network, data center, cloud, and security technology ecosystems. Whether you are planning a Software Defined Networking (SDN) implementation, network refresh, security segmentation strategy, or data center consolidation or move, ANM can help guide you through the complexities of planning and rollout.

We'd love to hear from you.
