

Cisco Powered Managed Services

Top reasons why businesses like yours need managed services

1. Simplify complexity
2. Security across all environments
3. Skills gaps
4. Consumption models

Managed services solves:

- Poor application performance that slows users down
- Weak technology infrastructure that exposes your business to security threats
- Solutions that jeopardize resources and business goals

Cisco Powered Services Criteria

Carefully selected partners who stand apart, qualified by Cisco after rigorous training, extensive testing, and thorough auditing.

They have met the highest standards to achieve Cisco Powered Services specializations.

Only these providers gain access to Cisco-proven blueprints detailing a complete picture of service requirements and the user experience.
