

Annual Packages

A SMARTER, MORE STRATEGIC APPROACH TO CYBERSECURITY TESTING & READINESS

Organizations today face increasing pressure to meet cybersecurity compliance standards and demonstrate resilience against evolving threats. Industry best practices for advisory services, especially Penetration Testing and Tabletop Exercises, recommend rotating vendors quarterly to ensure diverse methodologies and reduce blind spots.

But this approach creates new challenges:

- **Vendor Management Overload:** Juggling multiple vendors, contracts, and timelines.
- **Inconsistent Quality:** Varying standards and deliverables across providers.
- **Lack of Cohesion:** Disconnected insights that don't feed into a unified security strategy.

THE SOLUTION

ANM simplifies and strengthens your cybersecurity advisory program with our Annual Advisory Services Package, a fully managed, quarterly delivery model that brings together four elite cybersecurity firms under one umbrella, custom-tailored to your specific needs. We coordinate everything, giving you the diversity of expertise without the operational burden.

WHAT SETS US APART

- » **Single Point of Contact:** one contract, one project manager, four best-in-class partners.
- » **Strategic Oversight:** we ensure each engagement builds on the last—no duplication, no gaps.
- » **Operational Efficiency:** save time, reduce complexity, and stay audit-ready year-round.
- » **Tailored to You:** packages customized to your industry, risk profile, and compliance needs.

What's Included

Quarterly Penetration Testing

- **Types:** White-box, Gray-box, Black-box
- **Targets:** Internal Networks, External Perimeters, SaaS/Web Applications, Custom Applications
- **Delivery:** One unique partner per quarter, managed by ANM

Quarterly Tabletop Exercises

Scenario choices or combinations:

- **Red Team** (Offensive Simulation)
- **Blue Team** (Defensive Response)
- **Purple Team** (Collaborative Attack/Defense)
- **Gold Team** (Executive-Level Crisis Management)

Facilitated by: four distinct expert firms, coordinated by ANM.

DATA CONFIDENTIALITY & INDEPENDENCE

At ANM, we uphold strict confidentiality protocols to ensure the integrity and independence of each advisory engagement. We do not share findings, reports, or insights from one quarter's engagement with any of the other participating firms. Each advisory services firm begins their assignment with only the context and parameters mutually exclusive to their specific engagement. This approach guarantees unbiased assessments and preserves the objectivity of each test or exercise.

Your Journey Starts Here

Let's start a conversation about where your cybersecurity is today and how ANM can help you take the next step toward a secure future.
